DETAILED ACTION

Response to Amendment

1. The abstract filed 1-29-07 is acceptable. The 35 USC 112 and 103 rejections are hereby withdrawn. The obvious double patenting rejection is also withdrawn. The claim list filed 1-29-07 should indicate claims 19-34 as "withdrawn".

Allowable Subject Matter

2. Claims 1-18, 35 are allowed. The drawings filed 9-12-03 are acceptable.

Election/Restrictions

3. This application is in condition for allowance except for the presence of claims 19-34 directed to invention non-elected without traverse (see paragraph 3 in the office action mailed 9-28-06). Accordingly, claims 19-34 have been cancelled in the examiner's amendment below.

EXAMINER'S AMENDMENT

4. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows: Cancel claims 19-34.

Application/Control Number: 10/660,758

Reasons for allowance

5. The following is an examiner's statement of reasons for allowance:

The present invention includes independent claim 1. Claim 1 recites a method for manufacturing coated sheet to form a coated layer by a process. Strobrush et al is considered the closest prior art. Strobrush et al teaches a method for manufacturing a coated sheet to form a coated layer by a process including a process (1) for coating a coating liquid including a resin material and a solvent on a substrate, and a drying process (2) for drying a coated liquid, wherein the drying process (2) is a process for heat drying by heating means after an initial drying at ordinary temperature.

Strobrush et al does not disclose the claimed combination including:

a process (1) for coating a coating liquid including a resin material and a solvent on a substrate, and a drying process (2) for drying a coated liquid, wherein the drying process (2) is a process for heat drying by heating means after an initial drying at ordinary temperature, and in drying process (2), a value L at least after completion of the process satisfies a following relationship:

$$L = \int_0^T \frac{\sigma [mN/m] \times (h [m])^3}{\eta [mPa \cdot sec]} dt > 1.9 \times 10^{-13} [m^4 / sec].$$

(where: T: total period of drying process [sec]; σ: surface tension of coated liquid [mN/m]; h: thickness of coated liquid [m]; and η: viscosity of coated liquid [mPa·sec]).

Art Unit: 1762

For these reasons claim 1 as deemed to be allowable over the prior art of record, and claims 2-18, 35 are allowable by dependency.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Alain L. Bashore whose telephone number is 571-272-6739. The examiner can normally be reached on about 7:30 am to 5:00 pm (Mon. thru Thurs.).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Timothy Meeks can be reached on 571-272-1423. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
